

# SIZE GUIDE For Bed Linen

***The best way to pick the right size of bed linen is by mapping it to the dimensions of the bed/mattress.***

***Hence it is important to measure the dimensions of your mattress and then choose the dimensions of your linen accordingly.***

## **# What are the different sizes of Mattresses available in India?**

It is not uncommon to have some confusion about various mattress sizes.

More specifically, the differences between a full, a king or queen size mattress or the differences between a Single or a Single Large. Whether you are looking to buy new bed linens or a new mattress, it is important to be certain of which mattress size is going to meet your needs.

Here are some helpful hints about those varieties.

### Single :

- Single is also known as Twin. This is also referred to as a single and there are (2) varieties of this mattress: a regular Single (Twin) (78 \* 36") and a Single Large (78\*42).
- The majority of twin mattresses you will find in retail stores measure 78 \* 36". However, you could come across a Single Large.
- Single Large mattresses are commonly used in college dorm rooms.

### Full :

- This mattress size is also called a double. A Full mattress measures 78\*54".
- This mattress size has decreased significantly in popularity, impacting the availability and selection of full-size bedding. They are commonly used where the room size is significantly small & cannot accommodate a Queen Bed. These normally accommodate only one adult comfortably, not 2.
- Most linen manufacturers use the same flat sheet, pillowcases (standard size) and duvet cover on a Full bed. The only difference is the fitted sheet. The duvet and comforter are often sold as a Full/Queen size.

### Queen :

- This variety measures 80\*60" and is an extremely popular size.
- It is ideal for 2 adults of normal size.

### King :

- This size measures 78\*72" and is ideal for large size bedrooms.
- A regular king size mattress remains very popular size. It measures the same width and length as (2) extra- long twins. The width of a king mattress usually measures 78" wide, but that can vary by manufacturer.

**Mattresses sizes as mentioned above are considering only the length & width dimensions.**

**However, the thickness of the mattress also plays a significant in determining the size of the Bed Linen that will be ideal for the bed.**

## **# So what size Bed Linen is appropriate for your Mattress/Bed?**

Below mentioned are recommended sizes of Bed Linen for different sizes of mattresses of various brands available in India.
